22. Concept of Sustainable Development

Dr. Mahesh Jaiwantrao Patil

Assistant Professor (Political Science), Narayanrao Chavan Law College, Nanded.

Abstract

In the 21st century, there is a discussion about sustainable development (SD) in political, administrative, policymakers, bureaucrats, politician, and the common man and in academic circle. During the last decade, the world has observed a remarkable upsurge of concern about the sustainability of economic development over the long run. Considerable effort has been invested by the contemporary world in the design of an analytical framework. It can be used to think about policies and programmers that promote sustainable growth at all level. The concept of Sustainable Development has implied several methodological challenges to define what it means.

The concept of SD has undergone various developmental phases since its introduction at the Global level. The historical development of the concept has seen the participation of various organizations and institutions on the implementation of its principles and objectives of SD. This concept has experienced different critiques and interpretations over time. Still, it is difficult to define it. The definition of SD has become one of the most cited definitions in the literature.

Keywords: Concept of Sustainable Development, Inclusive Development, Environmental Degradation, Globalization, Sustainability Challenges, Global climate change.

Research Method

A qualitative and library-based research method used to analyze the historical development of Sustainable Development concept and how the Sustainable Development concept is developed.

A. Data Collection

The following sources of data used in writing this research paper.

1. Secondary Sources

A. Relevant reference books and research articles.

Note on Reference

The researcher has used the 'in-text' method for citation, mentioning the surname of the author, year of publication and page number at the end of the sentence. At the end of the research
