Abstract:

Information and communication technology is not the new thing in education field. In fact from time to time since long time there is change in teaching technology. New machines, tools are used in education for office, teaching and evaluation purpose. The present paper aims at the present digital or computerised technology for office, teaching and evaluation purpose.

Key words:

ICT; information and communication technology; computer; internet; teaching tools.

Introduction:

ICT means 'Information and Communication Tools' (herein after referred as ICT). Basically it is use of tools and things which are used for communication purpose in the education field. ICT include digital technology along with internet. Even a book, black board, chalk and duster are also tools used for teaching purpose. But now use of these thing are considered in conventional class room only. And these conventional tools are useful only in the classroom. Where as the new technology can be used inside and outside the classroom. Students can have access to the study material even they are not in the classroom or they are outside the school. A long term and continuous teaching learning process is there after use of ICT.

It is flipped type of classroom. Recently India has overcome from the huge unrest in the teaching field which occurred due to lock down and other restriction happened in the Corona pandemic situation. Almost every school and college or education institution was remained closed during lock down period. This caused a drastic change in office/administrative, teaching and evaluation methods. The world came to know about the importance of health and also technology. All person who are engaged in educational field are required to know about ICT for teaching, learning and evaluation. Day by day use of smart phones, tablet phone, computer (laptop and desktop), is increasing. Now a days we can see a student carrying either smart phone, tablet phone or a laptop with him to school or college.
